Blackberry Screen-Shot Utility

Foreword

The purpose of this manual is to explain how to install and use the BlackBerry Screen-shot Utility.

About the Utility

This is BlackBerry Screen-shot Application from Drish Infotech Limited. This application is tested with BlackBerry Curve 8310 Smartphone.

Installation Steps for PC Users:-

1. Install **BlackBerry Desktop Software** from "BlackBerry User Tools" CD.
2. Run the Desktop Manager. (Program -> BlackBerry -> Desktop Manager).
3. Double click on **Application Loader.** Application loader wizard will appear.
4. Click **Next** on Application Loader.
5. Click on **Add** Button and browse **ScreenShotProject.alx** file.
6. Click **Open**.
7. Now **Screen-Shot Utility** will appear in the application list.
8. Click **Next** to install.
9. Click **Finish**.
10. Click **Close**.

Installation Steps for Mobile Users:-

1. Take the control to Screen-ShotUtility.jad file and click on it.
2. A screen will appear that contains the description about the utility.
3. Click on the Download Button and the application will be installed automatically.

After installation, **PrintScreen** option will be visible at most of the screens like email, sms, calendar, addressbook, media, memos and tasks etc.

Blackberry Screen-Shot Utility

How to Use the application:-

1) To print any of the screens,

   ➢ Press the [⬛] Key
   ➢ Click PrintScreen
   ➢ A Dialog-box appears with the Save option.
   ➢ Click on the Save option and the image will be saved in the Memory card under Pictures folder.
   ➢ If the image with the default name already exists, then the Dialog-box appears which helps you to rename the image and save it.
